El ction/R strictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6,25-30,44-53 drawn to an electrode system for controlled drug release, classified in class 604, subclass 20.
- II. Claims 7-13,31-43, drawn to method of making the above mentioned system, classified in class 604, subclass 20.
- III. Claims 14-18, drawn to the process of using a controlled drug release electrode system, classified in class 604, subclass 501.
- IV. Claims 19-24, drawn to the process of using a specified material as a drug delivery system, classified in class 424, subclass 495.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group II and Group I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the electrode system could be made by another method.

Inventions of Group I and Groups III,IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that

Art Unit: 3763

product (MPEP § 806.05(h)). In the instant case the process described may be employed by another structurally different device.

Because these inventions are distinct for the reasons given above and having acquired a separate status in the art as shown by their different classification, and that different search are required for the different groups, restriction for examination purposes as indicated is proper.

A telephone call was made to Paul A. Lesko on June 19, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
